**7:30pm - 11:00pm**

**The Metropolitan**

**3 Glen Cove Road, Glen Cove**

**516-671-4444**

## ABOUT DISCOVER THE SMILE FOUNDATION

**Discover The Smile Foundation, Inc.** is an incorporated non-profit organization dedicated to de-institutionalizing children's healthcare facilities. By introducing stimulating artwork and interactive exhibits, the hospitals we touch will become much more welcoming to young patients and their families, and better workplaces for healthcare professionals. The end result will be superior, more competitive hospitals for our community, and easier and more cheerful hospital experiences for our community's children.

Thanks to the generosity of our donors, Discover The Smile has successfully completed its Phase I goal at Schneider Children's Hospital, located in New Hyde Park, New York. In early 2004, we installed five major interactive exhibits in the main lobby area – Space Walk, two Aqua Circus virtual aquariums, a three-computer Kaleiodraw Kiosk and a six-foot candy mural – all of which have helped to transform the hospital's lobby into an exciting, playful and engaging environment. Since installation, Discover The Smile has received rave reviews from all levels of hospital staff – these exhibits have brought laughter and diversion to young patients and their families, helping to make an extremely difficult time a little bit easier. Plans for Phase II at Schneider Children's Hospital have already begun. A number of equally exciting and unique exhibits are being designed specifically for a number of the hospital's busiest spaces, including the hematology/oncology waiting room and transfusion rooms, the ambulatory surgery waiting room, and the Heart Center. These exhibits will be funded, in large part, by the proceeds from our Second Annual Gala Event – we hope you can join us!

We are proud to honor **Gregory G. Galdi**, President and Founder of **Custom Computer Specialists, Inc.**, as this year's **Community Business Leader**. Since founding his company in 1979 – which is now Long Island's largest privately held technology solutions provider – Mr. Galdi has been committed to making technology accessible to children. He has provided Internet access for more than 1 million NYC school students through the implementation of network infrastructures in over 1,200 NYC schools; has designed, built and donated a computer lab for Long Island University's Southampton College; and has sponsored and provided funding and hands-on assistance to many non-profit organizations seeking to enhance education and opportunity for Long Island's youth.

Please join us in helping the children forget their troubles, and have something exciting and interesting to think about during their hospital visit. Please consider an individual or corporate sponsorship to help us achieve our important mission.
